When I started reading this book, I read it for hours nonstop because it was an interesting book.

It starts with housecat Rusty exploring the woods, and he meets the wild cats and learns their way of life in the wild, as they cooperate with other Clans of cats and fight battles. It follows his journey as he tries to fit in, and eventually discovers a mysterious, dangerous secret of another cat on his way to making warrior...

I think this was a good book because it had intriguing scenes, and introduced the way the warrior cats live without making it too factual and through the point of a new character. The way this book was written was nice, and a good age recommendation would be 8-13 years of age because it has fights, death and gore. The only thing I didn't like was the first part, which went on for a bit.
